Subject: Microsoft Settlement

This proposed settlement must have the MS lawyers laughing at the naiveté of the DOJ attorneys. I'm sorry, but this settlement advances only their company rather than allowing other competitive (Solaris, Mac, Linux, etc.) operating systems to have any chance of being taught in the school systems. Educational instruction should be focusing on diversity rather than hegemony.

-Brian J. Dowd
(But I'm an MS stockholder, so I'll win whatever you do!)
